THEFT OF MOTOR VEHICLE

The data provided is the number of recorded crimes for theft of motor vehicle and the outcomes of those recorded offences.

We often get asked about makes/models/types of vehicles; we are unable to provide this information in any accurate form, as the fields for recording this data are not mandatory.

It should also be noted that when a theft of motor vehicle is recorded the make and model can be recorded under different fields. These fields are also 'free text input' fields so there isn't a simple way of grouping vehicle types without manual intervention.

For example:

A BMW X3, can be recorded as BMW or X3 or BMW X3 or nothing at all and a registration number is only present.

The same applies for the type of vehicle for example a BMW RS1100 (motorbike) – can be recorded as BMW – RS1100 – BMW RS1100 without stating it is a motorbike.

THEFT FROM MOTOR VEHICLE

The data provided is the number of recorded crimes for theft from motor vehicle and the outcomes of those recorded offences.

We often get asked about what was stolen from the vehicle; we are unable to provide this information in any accurate form, as the fields for recording this data are not mandatory

It should also be noted that when a theft from motor vehicle is recorded the property can be recorded under different fields. These fields are also 'free text input' fields so there isn't a simple way of grouping vehicle types without manual intervention.

For example:

A theft of a mobile phone from a car can be recorded in the property field as iphone (or other brands) or mobile or device etc. The same applies for other properties with the field being 'free text' entry.
